

# FROZEN ANIMAL EGGS

## Materials

Water

Balloons

Small Animals

## Instructions

1. Squeeze the animal into the balloon before it is inflated
2. Blow the balloon up so it is the size of your hand- you want to be able to fit these into your freezer!
3. Once inflated, tie the balloon and place in your freezer until the water is frozen and the balloon feels hard- you might want to do this the night before you want to use them.
4. Once the balloon is definitely frozen, use some scissors to cut the knot off the balloon and tear the rest of the balloon away so you are now left with your frozen animal egg!
5. Use warm water to try and melt the water away so the frozen egg hatches!

# HOMEMADE GLOOP

## Materials

Water

Cornflour

Food Colouring

Bowl

Spoon

## Instructions

1. Use two cups of cornflour and one cup of water, mix with no more than 4 drops of food colouring- this will need a big stir!
2. If it feels too runny, you can add more cornflour a spoon at a time, if it feels to thick add some more water slowly until you have a gooey slimey texture!
3. Use your animals to make footprints or roll the animals around in the slime; they are easy washed!
4. You can keep this in the fridge for a couple of days if you cover it up; you may need to add a little more water to use again.

You can also colour your rice using the food colouring, add a few drops to the bags and move around until you have them all covered. Your children can use this with their animals or slime. This messy play does come with a cleaning requirement!
